**Subject:** Follow-up from our 10/18/16 call on Uinta Basin enhanced mitigation

Hi Stephanie and Leonard,

Since our call this week I've followed up with others in the Air Program about what we can share regarding EPA's efforts to create a FIP for the Uinta Basin.

Although EPA hasn't shared specifics of the proposal yet, this is what I was told and what I can share.

EPA has a draft FIP that is with OMB now, for their review. The proposed FIP covers existing sources and aims to level requirements in Indian Country with those that already exist in state jurisdiction. The FIP also is consistent with the NSPS OOOO (and presumably OOOOa).

I know that might not be much information, but for now that's what I know. We'll be sure to keep you posted as the process continues.

Thank you so much for the opportunity to talk this week and we look forward to continuing to work with you on these projects.

Best,

Christopher Razzazian
